

# Intec®

## What is Intec?

Intec protector is the effective way to protect your carpets and fabrics from dirt and stains.

Developed for commercial use in hotels and airlines, this innovative resinous co-polymer formula is now available to you.

Intec is the most comprehensive protection available.

## An invisible shield

Intec forms an invisible shield around every fibre, keeping your furnishings looking good and making them easier to clean and care for.

Intec is extremely durable and gives lasting protection even in the most demanding conditions.

Intec dries in minutes and gives immediate protection with minimal disruption.

Intec does not alter the fabric's colour, texture or flame retardancy, so even the most delicate silks can be treated with confidence.

Intec has been designed to be environmentally friendly.

Intec is water based and it does not contain harmful solvents.

# Intec®

## Intec shrugs off dirt and spills

Intec's new soil release formula repels dirt - even oil based spills. Anti static agents prevent attraction of dry soils to carpets and fabrics, ensuring quick and effective everyday cleaning.

Intec reduces abrasion and significantly increases the usable life of your carpets and fabrics.

Spills are simply mopped up by absorbent paper or a clean towel – even dried in stains are easy to remove.

# Intec®

## Deep down protection

Intec's deep down protection ensures that when the stains disappear, so do the smells; even tobacco smells cannot linger in the fibres.

Unlike other household products on the market, Intec requires only one application no matter how often you clean your carpets and fabrics.

## Environmentally friendly

We continually develop our product to ensure that we remain the most efficient, cost effective, ecologically sound carpet and fabric protector on the market.
