

## THE SYSOLTEX<sup>®</sup> COLLECTION by TAPIBEL

Introducing a range of natural colours, textures and designs manufactured on the very latest, British built, computer controlled, Multi-Roll tufting machines and made to the highest quality standards from **Sysoltex<sup>®</sup>**, a yarn system developed exclusively for Tapiibel.

**Sysoltex<sup>®</sup>** is a complex fibre made by blending modified polypropylene, new poly acrylic and natural fibres using the latest technology in yarn engineering. This produces a carpet that looks and handles like a wool blend but which has a high degree of stain resistance and proves much more hard-wearing than a wool carpet of the same weight and style.

**Sysoltex<sup>®</sup>** is a 2 ply spun yarn which gives the finished carpets a very high resistance to pilling.

Carpets in **Sysoltex<sup>®</sup>** also have a clean natural look with excellent pattern definition and a range of subtle colours to satisfy the requirements of the most discerning consumer.

All designs in **Sysoltex<sup>®</sup>** are available in 4 m and 5 m width for fewer joints and less waste and are manufactured on a natural woven jute backing.

All **Sysoltex<sup>®</sup>** ranges pass BS7131 as suitable for heavy wear areas in the home or for general contract locations.

All carpets made in **Sysoltex<sup>®</sup>** also conform to BS4790 for flammability and IBM / ICL standards for static resistance.
