Every effort is made to achieve accurate colour reproduction of products in this brochure, however printing limitations can be misleading. Selection of colours should be made from actual samples. Samples are small pieces cut from standard tiles. They give only a general indication of colour and do not necessarily show the complete design. Colour and shading can vary slightly from batch to batch, and it is not possible to guarantee that the colour of the sample will exactly match the material supplied. The policy of the Company is one of continuous development and improvement and the right is reserved to add or delete from the range or change patterns without prior notification.

Amisco[®]

Our designers travel the world with open minds, immersing themselves in exciting new trends and ideas to fire their imagination. It's this freedom that gives us the opportunity to create fresh designs and influence a truly unique style statement in your home. Within our new collection, you will find many styles, textures and colours to choose from, including the authentically replicated natural look and feel of **Wood** (p04) and **Stone** (p38), or our eye-catching **Abstract** (p62), Room Guide (p84) and Product Portfolio (p87). So read on, enjoy our new ideas, and in turn, allow your thoughts to be inspired by Amtico.

Wood

Wood brings with it a sophisticated, contemporary elegance. It has an unmistakably warm feel, with that certain natural charm that we all crave. With this in mind, our designers have created a range in **light tones** (p06), **mid-tones** (p16) and **dark tones** (p22). They all capture the inherent beauty of wood – the authentic knots and the organic flowing grain – so you can enjoy a real wood feeling in your home.

Dark Tones

3

Dark woods are one of the most dramatic style statements you can make in your home.

Our designers bring you a distinctive range of sophisticated tones for an ultra contemporary look, from the softest walnut to the deepest ebony. Create a dramatic and lasting impression with Wild Walnut's rich chocolate tones and contrasting vanilla slices. Alternatively, the more subtle Classic Walnut has all the dusty cocoa tones and copper highlights of the real thing.

Tropical Wood

Our designers have travelled from jungles to mangroves the world over, to bring you this truly different range of wild, rare woods. This is flooring at the forefront of interior design – strictly for trend-setters

Tropical Wood features golden Tigerwood to complement a rich Eastern look or our realistic Caramel Bamboo for a feeling of real sanctuary. Alternatively, select the dark, decadent plum tones of Brazilian Rosewood or the gold-strewn warmth of striking Merbau. Distinctive, stunning flooring designed to provoke a huge amount of admiration.

And, of course, all the advantages of beautiful rare woods, without endangering them further.

1

Brazilian Rosewood

Dark, decadent plum tones perfectly capture the look of rare Brazilian Rosewood, creating a touch of elegance and luxury in your home.

1. Brazilian Rosewood

2

Merbau

Merbau's warm red shading and unique gold-strewn grain adds a touch of the exotic to any design. This floor makes a stylish design statement but is timeless enough to work with more classic looks.

Bamboo

4

With the stresses and strains of today's modern world it has become even more important to make your home your sanctuary. Bamboo and Caramel Bamboo achieve this perfectly, with bright yellow and creamy butterscotch tones creating a calm and tranquil environment with all the natural look of bamboo flooring. Unlike the original however, our version is incredibly hard-wearing and ideal for high-traffic areas.

Retro

A wide-spread interest in alternative, graphic and linear patterns, as well as a growing desire to relive design memories, all mean that eclectic retro is experiencing a revival.

Which is why our designers have brought back a much-loved design classic – teak. Our 21st Century take on teak is the ideal backdrop to explore retro design in all its forms. Vintage Teak's warmth is the perfect complement to the retro palette of mustards, teals and oranges, while its strong grain works well with the bold patterns and curves which dominate retro interior design. So now you can carry off this fun style statement with complete confidence.

Stone

Stones bring elegance and sophistication into their surroundings. They create a simple, natural backdrop which offers the great versatility we all desire when styling our homes. Which is why our experienced designers have developed their own range in [pale](#) (p40), [fossil](#) (p46), [slate](#) (p54) and [concrete](#) (p58). They are all perfect replications of the most popular natural stones – with all the distinctive veining and striking asymmetric patterning of real stone – but with all the warmth and practicality you require for your home.

Slate

4

Slate falls into all the key trends of rustic, natural and classic design. Therefore our designers have developed a tile with all the sophisticated appearance and versatility of real slate, but with much more functionality.

It can be laid in contemporary looks for an urban feel, or as an elegant contrast in a neutral space.

For the most realistic alternative to natural slate, try our Cumbrian Slate with its soft muted greens and horizontal patterning. Or for a contemporary graphite design, Welsh Slate's dark grey tones make the ideal flooring.

Welsh Slate

Welsh Slate's subtle charcoal and blue tones combine with a rugged surface texture to perfectly mimic the aesthetics of natural slate. This look's understated elegance is ideal for use in kitchens, equally at home against modern or more traditional design schemes.

1. Welsh Slate Brick Block Design with Silver Feature Stripping

2

European Slate

European Slate's saturated dark tones are designed to make a dramatic and lasting impression. This tile brings a masculine feel to any environment.

2. European Slate Dark Grey Random Block Design

Concrete

Concrete has recently enjoyed a reinvention as a highly desirable design material. You cannot fail to feel its influence within all types of 21st Century design – and it's this raw industrial chic which will make your home stand out from the crowd.

1

Our designers have developed a version of concrete that not only replicates this unique aesthetic appeal but is also, unlike the real thing, extremely functional. This ultra-modern range is simple to maintain, practical for high-traffic areas and has all the warmth that natural concrete lacks. Which means you can enjoy this cutting-edge material, and the bold statement it makes, in your own home.

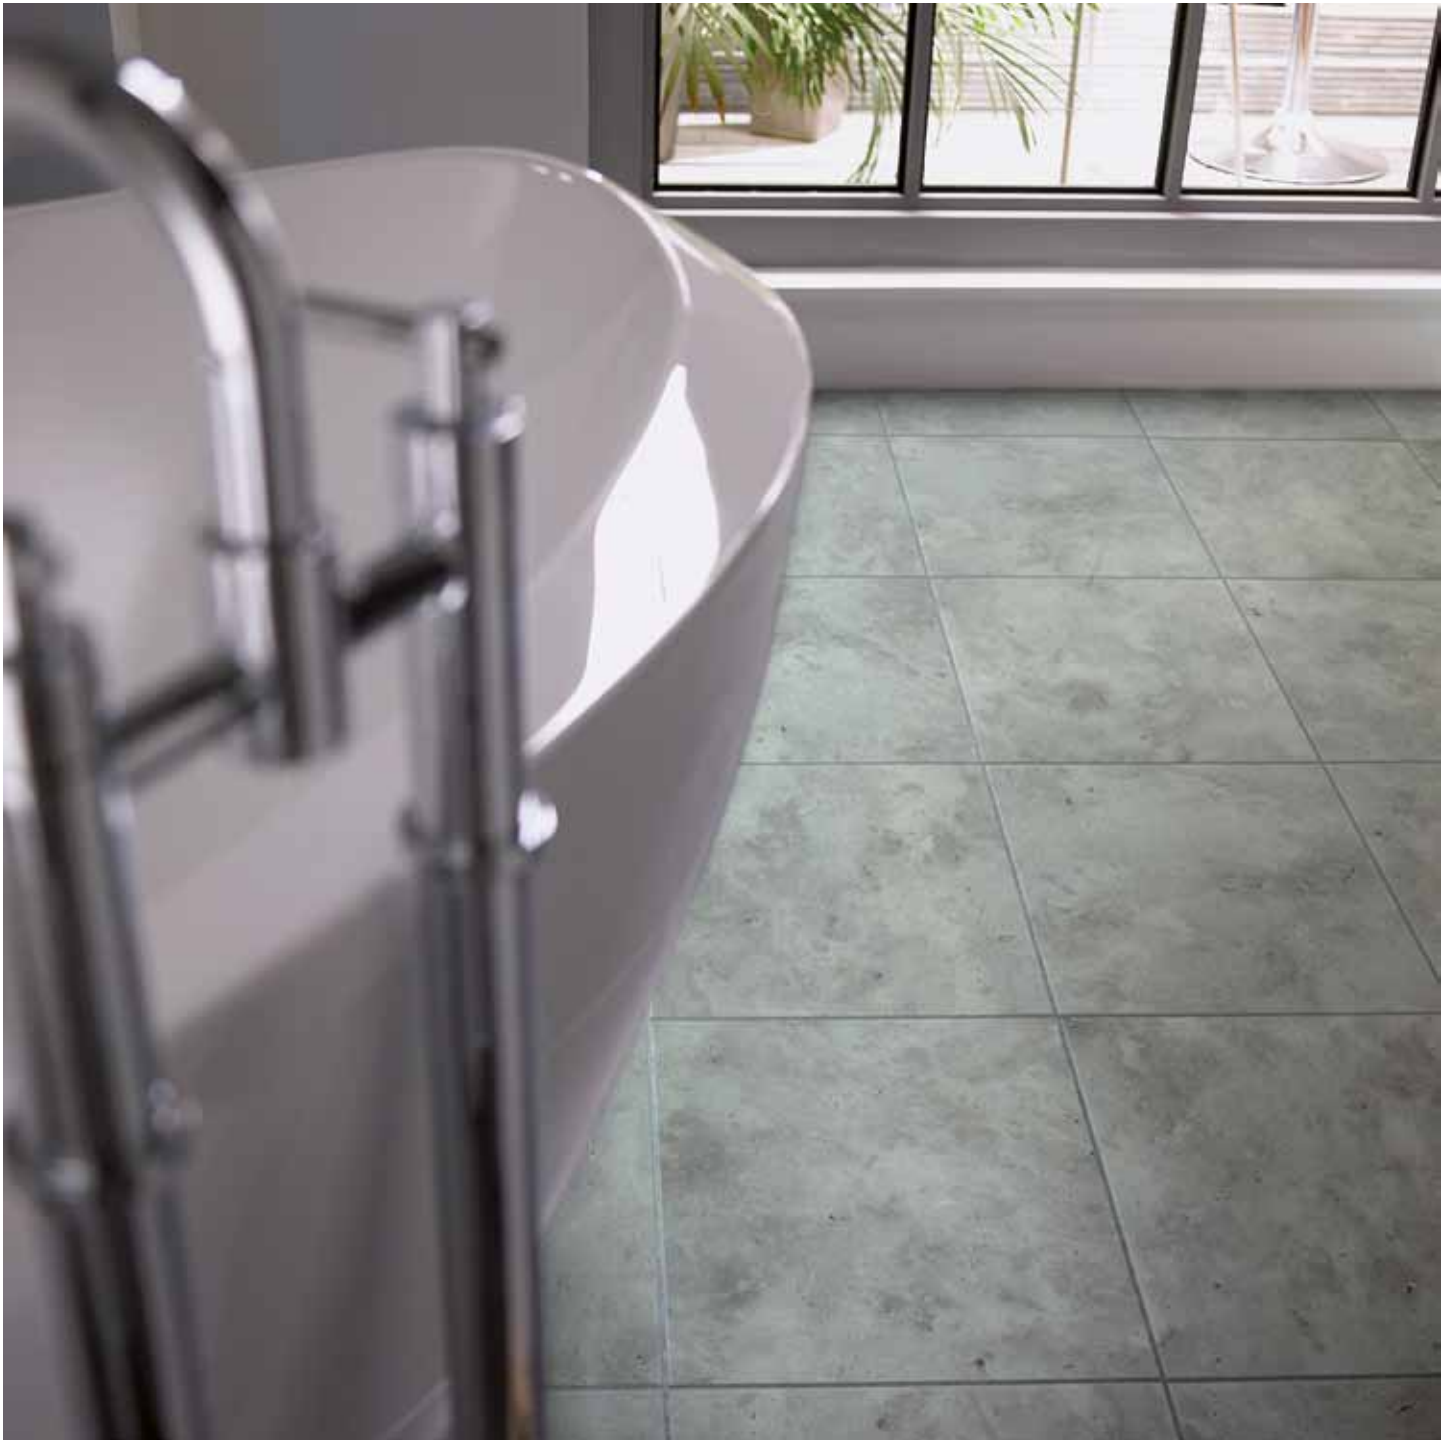

1

Exposed Concrete

Exposed Concrete features air bubbles and an uneven poured finish to give an incredibly authentic concrete effect. Unlike the real thing, Exposed Concrete is warm underfoot and easy to maintain. It looks stunning against stark white, metal and glass for an ultra-modern loft-living style.

1. Exposed Concrete Linear Block Design with Easygrout

2

Worn Concrete

With its bold grey colouring and uneven tones, Worn Concrete is an incredibly realistic alternative for high-maintenance concrete. It creates the perfect cool, neutral backdrop to any space or a striking industrial finish when teamed with contemporary accessories.

2. Worn Concrete with Silver Feature Stripping

Abstract

Sometimes we all want to make a statement in interior design. We desire something more than wood and stone floors – flooring that is beyond distinctive. Our designers have created a spectacular collection of unique, individual styles, inspired by bold design. They are available in **Glass** (p64), **Linear** (p66), **Metallic** (p68), **Back to Black** (p74) and **Brights** (p78) – so you can truly personalise your interior design.

Glass

1

2

3

Architectural and structural features have become increasingly popular in interior design. With this in mind, our designers were inspired to capture the real beauty of glass, combining transparent tinted layers and a pearlescent sheen to develop flooring that is not only striking but warm underfoot, unlike glass itself.

Our Polar Glass has a bevelled surface to allow light to refract around the space, creating a light and spacious feel. It is available in four ice-tones and teams particularly well with crisp white for a distinctive, tranquil environment.

4

5

Inspired by retro tones and the trend for subtle stripes, Linear is a versatile collection of flooring created for use in a wide range of styles. Combine with boldly coloured furnishings and fabrics for a statement-making contrast, or as the perfect backdrop to a more classic design scheme. Try laying Linear in planks, square tiles or a combination of formats to really personalise your room.

Metallic

3

4

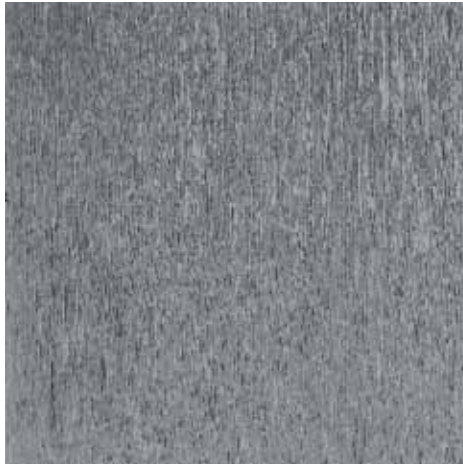

White metallics provide the most clean, contemporary look for any room. They provide a striking alternative to neutrals as they work incredibly well with any colour or textural finish. The reflective surface on this flooring also floods the room with light to open up the smallest of spaces.

To achieve a spacious feeling, try Molten, with a soft white pearl sheen and an organic texture below a smooth surface. Alternatively, Urban Metal Frost's soft lustre looks fresh and beautiful with silver stripping, as well as creating the illusion of light and space in your design.

Designed for a Sustainable Future

We're delighted that our investment in sustainability has produced some encouraging results and has greatly reduced our carbon footprint. Our commitment to the environment began long before anyone was required to think about corporate sustainability, and it's still something we care about. Our aim is to continue to work towards creating a truly sustainable business - building upon the good work we began many years ago.
