# stair edgings & clip top - colour availability 2010

This leaflet outlines the new colour offer from January 2010 for Stair Edgings (pages 1-3) and Clip-Top (see reverse for details). This supersedes all colour information included in the Stair Edgings and Floor Trims catalogue (June 2009).

## stair edging channel colours

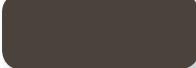

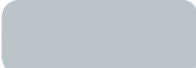

This range of stair edging colours from Gradus provides a comprehensive solution allowing specifiers and users to achieve colour contrast to the surrounding floorcovering in line with recommendations in 'The Building Regulations 2000-Approved Document M – "Access to and use of buildings" and BS8300:2009 (see pages 166 to 168).

All colours have been developed to provide a wide choice of colour contrast with matching colours for both insert and channel, and have been measured for light reflectance/colour contrast (LRV using the CIE Y value - see pages 164 to 165 of the Stair Edgings and Floor Trims Catalogue June 2009) and have been colour referenced on the NCS colour system.

Four new colours - Clay, Sky, Jade and Duckegg - have been added to provide colour contrast at the lighter end of the LRV scale for use with darker floorcoverings.
