A water-based acrylic adhesive, which is designed to give good tack, high bond strength and good resistance to plasticiser migration. It is non-staining, non-flammable and protected against biodegradation. The adhesive can be used for bonding Amtico PVC floorcoverings to concrete and other sub-floors, screed, terrazzo, plywood and other compounds are used, where appropriate. For areas that are subject to large variations in temperature (eg. conservatories or heating in sunny windows) or where underfloor heating is installed, Amtico HT adhesive should be used.

From any contamination, smooth, dry and free of dust. Direct to earth bases should be effective damp proof membrane.

smooth, dry and free of dust. Direct to earth bases should be effective damp proof membrane.

Tiles, apply a thin layer of adhesive to the back of the tile. Press the tile into the adhesive. Hold the tile in place for 10-15 minutes. Do not walk on the tiles for 24 hours.

Stir thoroughly before use. Use a trowel to apply the adhesive. Hold the tile in place for 10-15 minutes. Do not walk on the tiles for 24 hours.
