Key features of the Bronte range.

All of our ranges are made in the UK at our factory in Lancashire and include 11 plain Saxony & Velvet qualities and 6 Shag Piles all made from 100% wool 2 ply yarn and 4 twist pile qualities made from 80% wool 20% nylon 2 ply yarns.

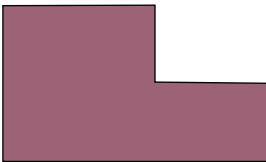

Any Colour.

Our range includes a selection of 60 standard colours to choose from but if you require a colour that is not in our range, simply send a sample of the colour you require and we will dye yarn specially to match your sample.

Any Width.

We make every carpet to fit your sizes in any width from narrow widths to extra wide pieces up to 12 metres wide without any seams.

Made to plan.

For irregularly shaped areas such as L shapes or T shapes we make the carpet to the shape required without seams or joins. This also cuts down on waste as you only buy the carpet you need.

Hand Crafted Borders.

In addition to our plain ranges we have our completely custom made Hand Crafted Border collection. These can trace the perimeter of a room or can be used to frame a centrepiece such as a dining table or coffee table.

Due to the specialist nature of this range we also offer a measuring service for borders.

Custom made service.

As all of the carpets we produce are custom made we have much greater flexibility when it comes to the individual qualities we can make and can adjust our machines to make different specifications as required. Therefore although we offer a number of standard qualities and weights in our range, if a carpet is required to match an existing carpet which may not be from a Bronte range we can usually make a carpet to match if provided with a sample.
