

Select and Transform

Whatever your taste and whatever your space...

...it must be Moduleo®

Bring warmth and character into every room of your home with the authentic natural look of Moduleo® luxury vinyl flooring. Hard-wearing enough for demanding public spaces and busy homes, beautiful enough to make any floor magnificent, there's a Moduleo® design for you – whatever your taste and whatever your space.

Designed to amaze

A Moduleo® design floor forms the stunning foundation to any space. With over 90 designs in the range, whether you're looking for wood or stone, Moduleo® is sure to have something ideal for you.

Atlas Slate 36962 Transform p72

Inspired by nature

Every Moduleo® floor authentically captures the character, details and textures of natural materials, but without any of their drawbacks.

Rich, warm wood help to create a space that is inviting and full of character, while the ancient intricate patterns of stone are perfectly suited to hard-working areas.

Concrete 40110 Transform p64

Dryback and Click

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional. For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Every Moduleo® design is available in dryback, but there are also many designs available in Click - the quick and easy way to achieve a Moduleo® floor yourself.

Look out for the Click symbol on pages 36-37 and 76-77, which indicates whether a design has a Click option.

Introducing Moduleo®

Select

Transform

Why Moduleo®

Far more than just a beautiful floor

Although Moduleo® floors certainly add elegance to any environment, it's not enough to just look good. That's why our floors are designed to be more than a match for the demands of a modern family home or a busy commercial space. They're also designed to last - every Moduleo® floor comes with a minimum 15 year guarantee to ensure a backdrop that you and your family can enjoy for decades to come.

Latin Pine 24110 Transform p50

Make a splash

Spills and splashes are all part of family life, but fortunately, living with Moduleo® is a breeze.

Moisture resistance makes it ideal for use within kitchens and bathrooms, while its easy clean surface helps you keep your floor at its best for years with little fuss and no stains.

Sicilian Slate 36866 Select p32

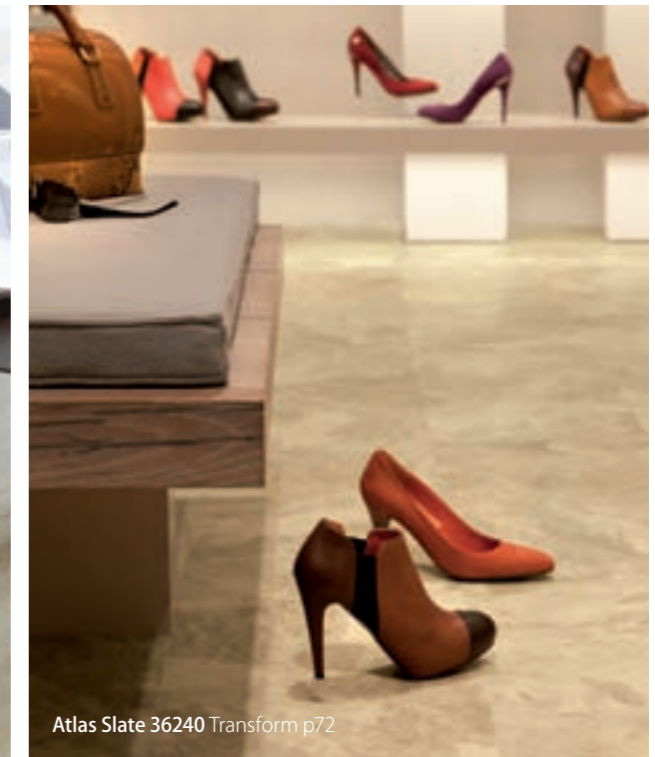

Work hard, play hard

Enjoy your floor without fear of damaging its surface thanks to the wear layer giving your Moduleo® floors exceptional strength and resistance to scratches or scuffs.

We also know that accidents happen in a busy home, but excellent impact absorption means that a little bump doesn't have to mean a big drama.

Why Moduleo®

The make-up of Moduleo®

The Moduleo® range comprises of both planks and tiles that can be fixed either floating or glued down. Because of their unique structure, the Moduleo® planks and tiles stand out due to their rigidity, their ease of maintenance and their natural appearance.

Moduleo® is composed in a multi-level format to provide the ultimate in performance and aesthetic quality.

- **Urethane treatment:**
A surface that protects against everyday wear and tear. Added slip, scuff and stain resistance and lower maintenance.
- **Design foil:**
Unique patterns and colours are applied to the design foil by means of an innovative printing technique.
- **Wear layer:**
The wear layer provides the durable surface of the products. The surface embossing provides an authentic and natural appearance, improving slip resistance to R10.
- **Backing:**
The construction of the backing layer provides stability to the tile and ensures optimal adhesion to the floor.

Moduleo® Design Floors are high-quality design floor solutions intended for both home and commercial use

Select Wood

For the home

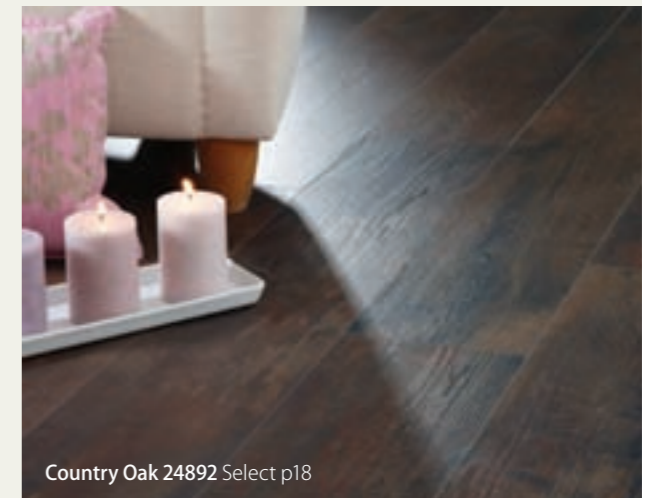

Warmth, detail and authentic grain? Must be Moduleo® Select Wood

The Select range of wood designs bring authentically recreated details and textures of natural wood into your home. Designed especially for domestic interiors, Select includes an option for any taste so that you can stamp your individual style on any room.

Wonderful wood

If you love the familiar rustic charm of traditional classic oak, the unique features of rough sawn timber found in Tectona Teak, or even the bold design statements offered by distressed wood effects, these styles and so many more are available to you in the Select range.

Our larger planks reduce repetition, helping to recreate the natural variety in wood better than ever and create a floor that's difficult to distinguish from the real thing.

Country Oak 24892 Select p18

Classic Oak 24125 Select p12

The individual feel of our woods reflect the textures and details of nature.

Dryback and Click

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional.

For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Dryback and Click

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional.

For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Every Moduleo® design is available in dryback, but there are also many designs available in Click – the quick and easy way to achieve a Moduleo® floor yourself.

Look out for the Click symbol on pages 36-37, which indicates whether a design has a Click option.

Sublime stone

The rich textures of a range of stone materials are lovingly recreated in a range that covers everything from the muted tranquillity of marble to the bold sleek lines of Sicilian Slate.

Flooring favourites such as limestone, sandstone, granite and concrete are also included in the Select collection.

The random patterns found in our stone floors give a realistic impression of authentic stone floors; a feeling that is enhanced by the contoured finish you'll find on their surface. These patterns combine in your home to create true impact in any room.

Transform Wood

For commercial and home use

Rich, detailed and reliably robust?
Must be Moduleo® Transform Wood

Classic Oak 24815 Transform p54

Ethnic Wenge 28890 Transform p46

The Transform range of wood designs provides professional, modern floors for commercial and residential use, combining a professional aesthetic and durability for high use areas. Professional accreditations such as ISO9001, ISO4001 and an A+ rating for indoor air quality also provide the peace of mind that comes with choosing a superior quality flooring finish like Moduleo® Transform.

Excellence engrained

The wood range of Transform products faithfully recreate the stunning detail and texture of natural timber, but with the convenience of vinyl flooring.

The wide range of designs allows for the creation of bold design statements, give areas a traditionally classic feel or lend an air of exclusivity and sophistication to any environment.

The Protectonite PU coating is key to its outstanding strength, providing a scratch and scuff resistant layer that also has a R10 slip rating, making it a safe choice for employees and the public. A 20 year guarantee also ensures that the delicate grains of wonderful wood will still be performing for years to come.

Dryback and Click

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional.

For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Every Moduleo® design is available in dryback, but there are also many designs available in Click – the quick and easy way to achieve a Moduleo® floor yourself.

Why
Moduleo®

Why Moduleo® Ecological

Our purpose-built 'green' factory in Belgium not only manufactures our luxury flooring in an eco-friendly way, but also means that unlike many flooring companies, we do not import our product from the Far East.

Each Moduleo® floor contains up to 50% recycled materials and can be recycled at the end of their product life. During their lifespan, our floors are user-friendly, as well as eco-friendly. Maintenance doesn't require harsh chemicals, while their heat insulating properties mean that you can lower your thermostat and thus, your energy consumption.

We are continuously endeavouring to improve each aspect of our business, with rigorous selection and inspection of raw materials, green energy, minimal water consumption, saving on transport. Ensuring that Moduleo® is an ecologically responsible and intelligent choice for the future.

Moduleo® is an ecologically responsible and intelligent choice for the future

Produced with green energy

Our production site in Avelgem is being equipped with three wind turbines that adhere to the strictest standards of noise pollution and shadow casting. With a maximum production of 6.9 MW, the turbines will provide over 50% of the energy needs of the Moduleo® production unit.

Raw materials from a controlled origin

At Moduleo®, we make sure that our production processes fall within all international standards. This extends to the selection of raw materials for our floors, all of which adhere to the REACH regulations.

Made in Belgium

All Moduleo® Design Floors are made in Belgium, close to our customers and avoiding long, energy-consuming transport. A conscious environmental choice to reduce CO₂ emissions and to limit our ecological footprint to a minimum.

35% to 50% recycled material

The Moduleo® design floors consist of 35% to 50% of recycled material of a controlled origin. This way, we obtain particularly 'pure' PVC, via post-industrial recycling.

Water-based ink and lacquer

We exclusively use environmentally friendly inking methods and a water-based polyurethane lacquer for the protective layer of our floors.

A minimum of packing material

We are constantly striving to improve our packaging methods and to find innovative ways of reducing waste.

Introducing
Moduleo®

Transform

Why
Moduleo®

Why Moduleo® Benefits

Besides looking fantastic, Moduleo® offers a range of features that make your life easier and ensure that the floor stays at it very best for years to come.

We're passionate about the quality of our products and are constantly looking for ways to enhance the beauty and performance of Moduleo® luxury floors.

Dryback

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional. For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Easy to install

Thanks to our innovative Click technology you can quickly and simply install your Moduleo® luxury vinyl flooring with minimal fuss. Click removes the need for adhesive and is available across many of our ranges where the Click symbol appears.

Hygienic and easy to clean

No expensive cleaning agents are required to keep your floor at its best; just a simple broom, mop and vacuum cleaner. A Moduleo® floor will not harbor dust mites and other allergens. We've even put together an easy maintenance guide which provides helpful tips and advice.

Protectonite PU Protection

Each floor tile is protected with a Protectonite PU: Extra Polyurethane layer which protects the floor against scratches and dirt, offering maximum protection with minimum maintenance. A transparent wear layer that protects the design foil.

Heat insulation

Excellent heat insulation means that Moduleo® flooring feels warm to the touch, perfect alongside underfloor heating and for getting out of bed on those cold mornings.

Impact resistance

Moduleo® flooring has excellent impact resistance, making them perfect for busy family homes.

Slip resistance

Whether you are looking for a product to fit in your hallway, utility room, or even boot room; Moduleo® is a great slip-resistant solution. Moduleo® vinyl flooring has undergone considerable tests in critical conditions using both the pendulum and ramp method of slip-resistant testing and has consistently proved to be a safe solution with a slip rating of R10.

Sound-proof

Unlike traditional wood or laminate flooring, Moduleo® flooring absorbs sound thanks to a sound-proof base, giving better acoustics in your home.

Moisture-proof

An easy clean, moisture-proof wear layer makes Moduleo® flooring suitable for any room, even bathrooms and kitchens.

Design highlights

Natural look and feel

By using a structure press, the top layer of the tiles feature a relief that accurately recreates the subtle textures of natural materials, allowing you to feel wood grains and stone grooves.

Minimal shrinkage or expansion

Thanks to their patented construction with a double fibre glass membrane, all Moduleo® Design Floors have extremely high dimensional stability.

Extra long

Moduleo® goes to great lengths to ensure every floor will be unique and will retain that natural look. The number of repetitions in the design must therefore be kept to a minimum.

Bevel

The bevel accentuates the Moduleo® planks and tiles, contributing to the natural appearance of your floor.

Guaranteed quality

15 year guarantee on Select collection. 20 year guarantee on Transform collection.

Clear Print

At Moduleo® we apply a unique printing technique, using a very fine dot screen. This allows us to print our designs razor-sharp, so it's almost impossible to tell the difference from the real thing.

Whatever your taste and whatever your space...

...it must be Moduleo®

Bring warmth and character into every room of your home with the authentic natural look of Moduleo® luxury vinyl flooring. Hard-wearing enough for demanding public spaces and busy homes, beautiful enough to make any floor magnificent, there's a Moduleo® design for you – whatever your taste and whatever your space.

Designed to amaze

A Moduleo® design floor forms the stunning foundation to any space. With over 90 designs in the range, whether you're looking for wood or stone, Moduleo® is sure to have something ideal for you.

Atlas Slate 36962 Transform p72

Inspired by nature

Every Moduleo® floor authentically captures the character, details and textures of natural materials, but without any of their drawbacks.

Rich, warm wood help to create a space that is inviting and full of character, while the ancient intricate patterns of stone are perfectly suited to hard-working areas.

Concrete 40110 Transform p64

Dryback and Click

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional. For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Every Moduleo® design is available in dryback, but there are also many designs available in Click - the quick and easy way to achieve a Moduleo® floor yourself.

Look out for the Click symbol on pages 36-37 and 76-77, which indicates whether a design has a Click option.

Transform

Why Moduleo®

Far more than just a beautiful floor

Although Moduleo® floors certainly add elegance to any environment, it's not enough to just look good. That's why our floors are designed to be more than a match for the demands of a modern family home or a busy commercial space. They're also designed to last - every Moduleo® floor comes with a minimum 15 year guarantee to ensure a backdrop that you and your family can enjoy for decades to come.

Latin Pine 24110 Transform p50

Make a splash

Spills and splashes are all part of family life, but fortunately, living with Moduleo® is a breeze.

Moisture resistance makes it ideal for use within kitchens and bathrooms, while its easy clean surface helps you keep your floor at its best for years with little fuss and no stains.

Why
Moduleo®

The make-up of Moduleo®

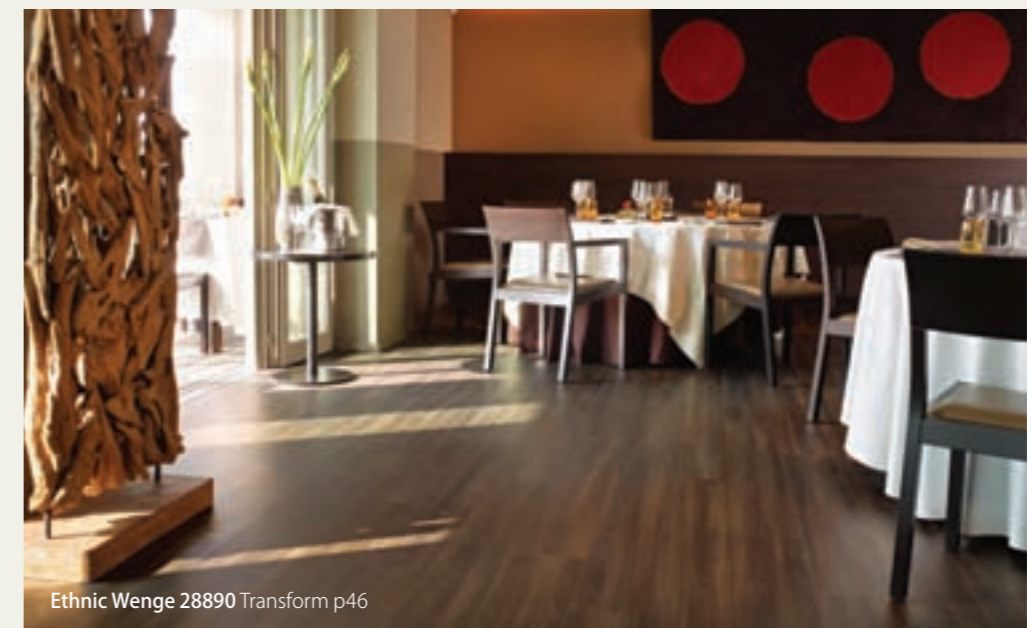

The Moduleo® range comprises of both planks and tiles that can be fixed either floating or glued down. Because of their unique structure, the Moduleo® planks and tiles stand out due to their rigidity, their ease of maintenance and their natural appearance.

Moduleo® is composed in a multi-level format to provide the ultimate in performance and aesthetic quality.

- **Urethane treatment:**
A surface that protects against everyday wear and tear. Added slip, scuff and stain resistance and lower maintenance.
- **Design foil:**
Unique patterns and colours are applied to the design foil by means of an innovative printing technique.
- **Wear layer:**
The wear layer provides the durable surface of the products. The surface embossing provides an authentic and natural appearance, improving slip resistance to R10.
- **Backing:**
The construction of the backing layer provides stability to the tile and ensures optimal adhesion to the floor.

Moduleo® Design Floors are high-quality design floor solutions intended for both home and commercial use

Select Wood

For the home

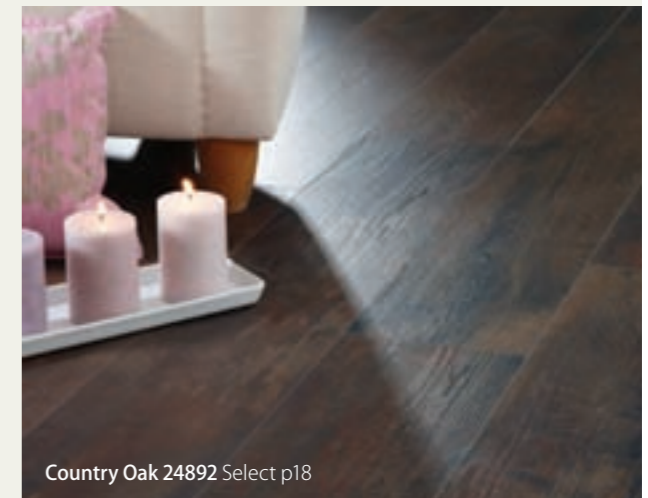

Warmth, detail and authentic grain? Must be Moduleo® Select Wood

The Select range of wood designs bring authentically recreated details and textures of natural wood into your home. Designed especially for domestic interiors, Select includes an option for any taste so that you can stamp your individual style on any room.

Wonderful wood

If you love the familiar rustic charm of traditional classic oak, the unique features of rough sawn timber found in Tectona Teak, or even the bold design statements offered by distressed wood effects, these styles and so many more are available to you in the Select range.

Our larger planks reduce repetition, helping to recreate the natural variety in wood better than ever and create a floor that's difficult to distinguish from the real thing.

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional.

For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Every Moduleo® design is available in dryback, but there are also many designs available in Click – the quick and easy way to achieve a Moduleo® floor yourself.

Look out for the Click symbol on pages 76-77, which indicates whether a design has a Click option.

Why
Moduleo®

Why Moduleo® Ecological

Our purpose-built 'green' factory in Belgium not only manufactures our luxury flooring in an eco-friendly way, but also means that unlike many flooring companies, we do not import our product from the Far East.

Each Moduleo® floor contains up to 50% recycled materials and can be recycled at the end of their product life. During their lifespan, our floors are user-friendly, as well as eco-friendly. Maintenance doesn't require harsh chemicals, while their heat insulating properties mean that you can lower your thermostat and thus, your energy consumption.

We are continuously endeavouring to improve each aspect of our business, with rigorous selection and inspection of raw materials, green energy, minimal water consumption, saving on transport. Ensuring that Moduleo® is an ecologically responsible and intelligent choice for the future.

Moduleo® is an ecologically responsible and intelligent choice for the future

Produced with green energy

Our production site in Avelgem is being equipped with three wind turbines that adhere to the strictest standards of noise pollution and shadow casting. With a maximum production of 6.9 MW, the turbines will provide over 50% of the energy needs of the Moduleo® production unit.

Raw materials from a controlled origin

At Moduleo®, we make sure that our production processes fall within all international standards. This extends to the selection of raw materials for our floors, all of which adhere to the REACH regulations.

Made in Belgium

All Moduleo® Design Floors are made in Belgium, close to our customers and avoiding long, energy-consuming transport. A conscious environmental choice to reduce CO₂ emissions and to limit our ecological footprint to a minimum.

35% to 50% recycled material

The Moduleo® design floors consist of 35% to 50% of recycled material of a controlled origin. This way, we obtain particularly 'pure' PVC, via post-industrial recycling.

Water-based ink and lacquer

We exclusively use environmentally friendly inking methods and a water-based polyurethane lacquer for the protective layer of our floors.

A minimum of packing material

We are constantly striving to improve our packaging methods and to find innovative ways of reducing waste.

Why
Moduleo®

Why Moduleo® Benefits

Besides looking fantastic, Moduleo® offers a range of features that make your life easier and ensure that the floor stays at it very best for years to come.

We're passionate about the quality of our products and are constantly looking for ways to enhance the beauty and performance of Moduleo® luxury floors.

Dryback

The standard format of Moduleo® flooring is dryback, which is glued to the floor and is recommended to be installed by a professional. For optimum performance, it is important that it is installed in accordance with the directions found within the Moduleo® instruction manual, which can be viewed on our website.

Easy to install

Thanks to our innovative Click technology you can quickly and simply install your Moduleo® luxury vinyl flooring with minimal fuss. Click removes the need for adhesive and is available across many of our ranges where the Click symbol appears.

Hygienic and easy to clean

No expensive cleaning agents are required to keep your floor at its best; just a simple broom, mop and vacuum cleaner. A Moduleo® floor will not harbor dust mites and other allergens. We've even put together an easy maintenance guide which provides helpful tips and advice.

Protectonite PU Protection

Each floor tile is protected with a Protectonite PU: Extra Polyurethane layer which protects the floor against scratches and dirt, offering maximum protection with minimum maintenance. A transparent wear layer that protects the design foil.

Heat insulation

Excellent heat insulation means that Moduleo® flooring feels warm to the touch, perfect alongside underfloor heating and for getting out of bed on those cold mornings.

Impact resistance

Moduleo® flooring has excellent impact resistance, making them perfect for busy family homes.

Slip resistance

Whether you are looking for a product to fit in your hallway, utility room, or even boot room; Moduleo® is a great slip-resistant solution. Moduleo® vinyl flooring has undergone considerable tests in critical conditions using both the pendulum and ramp method of slip-resistant testing and has consistently proved to be a safe solution with a slip rating of R10.

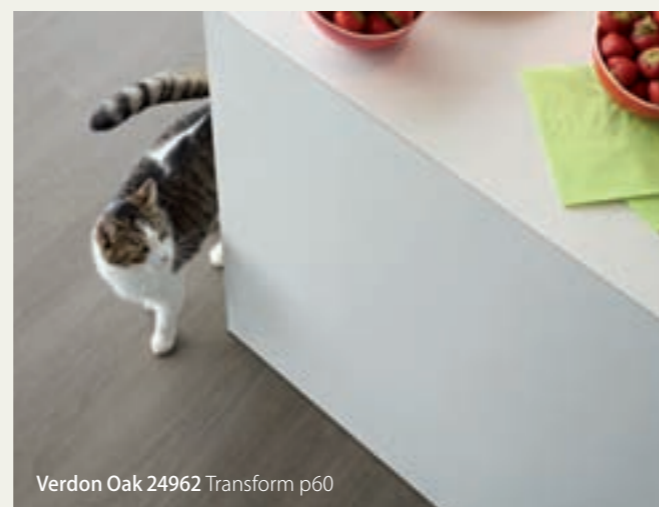

Sound-proof

Unlike traditional wood or laminate flooring, Moduleo® flooring absorbs sound thanks to a sound-proof base, giving better acoustics in your home.

Moisture-proof

An easy clean, moisture-proof wear layer makes Moduleo® flooring suitable for any room, even bathrooms and kitchens.

Design highlights

Natural look and feel

By using a structure press, the top layer of the tiles feature a relief that accurately recreates the subtle textures of natural materials, allowing you to feel wood grains and stone grooves.

Minimal shrinkage or expansion

Thanks to their patented construction with a double fibre glass membrane, all Moduleo® Design Floors have extremely high dimensional stability.

Extra long

Moduleo® goes to great lengths to ensure every floor will be unique and will retain that natural look. The number of repetitions in the design must therefore be kept to a minimum.

Bevel

The bevel accentuates the Moduleo® planks and tiles, contributing to the natural appearance of your floor.

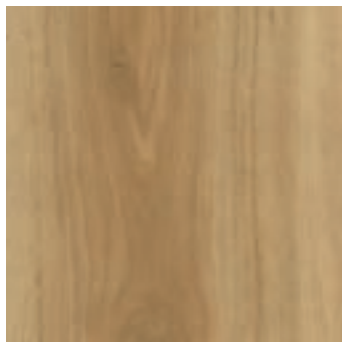

Guaranteed quality

15 year guarantee on Select collection. 20 year guarantee on Transform collection.

Clear Print

At Moduleo® we apply a unique printing technique, using a very fine dot screen. This allows us to print our designs razor-sharp, so it's almost impossible to tell the difference from the real thing.
