Please find herewith the confirmation of your order as it will be locked in production.
Due to scheduling requirements, any corrections on the data set should be sent to Lano by return.
All custom productions involve overages in function of the processes & qualities involved. The industry accepts that a (limited) part of this is supplied & invoiced with the order as per the following table: <2000 sqm: max. 10%/2000 sqm-<4000 sqm: max. 5%/from 4000 sqm: max. 3%. For Administer on total sqm : +/- 2%. Because of their nature, overages are a variable surplus of A-grade material and not a guaranteed quantity. They should not be taken into account during the quantifying process.
The delivery times are only indicative. Thank you for your trust.
