

2014/15 Football Predictor.

Scoring System: **Starts Saturday 1st November**

Ends last day of premiership.

1. 3pts for an exact correct score.
2. 1pt for a correct result (the right team winning or drawing, but not by the exact score predicted).
3. 5pts for correctly predicting a 0-0 score line.
4. Bonus points given for predicting higher scores correctly. Anything over 3 goals in a game will give 1 extra point for every goal scored, e g: 2-2=4pts, 3-1=4pts, 3-2=5pts, 4-1=5pts, 4-2=6pts and so on.

Other Rules:

Each week there will be 10 matches to predict, normally from the English premier league. If there aren't any being played, the games will be made up of Internationals/championship/cup.

All predictions for the week **MUST** be in by Midday Friday of game week, so that I can fill in score sheets to send out to everyone before matches commence. There may be an occasion

that you physically can't fill in your predictions (holidays or illness). To allow for this, everyone is allowed a default score. This default score will automatically stand for all games of that week eg: if you put 2-1, all games will go as 2-1....if you put 1-2 , all games will go as 1-2. So please be sure of your default score. Forward this score with your e-mail.

A league table will be updated after every game week has been completed.

Entrance fee and Prizes:

£30-00 to enter

Prizes determined by amount of entrants

Example: 4 players give's £120-00= £90-00 to winner & £30 to 2nd place

5 players give's £150-00= £110 to winner & £40 to 2nd place
