Balmoral is simply attractive and such good value for money. Designed to be equally at home in any bedroom, its stylish mouldings and rounded corners make for such an effective piece of furniture which will blend in with almost any style. Produced from solid pine which is plantation grown in the Americas and sourced from carefully managed forests. All draws are dovetail jointed for strength, whilst all drawer bases and backs utilise plywood for stability and durability. Each piece of natural pine is specially selected and only the finest grades of timber used. You will notice that there are virtually no knots in the timber we select. Every piece of Balmoral is stained to an antique colour and finished off with several coats of hard wearing easy clean lacquer. All you need to do to this furniture is to give it an occasional wipe with a slightly dampened cloth. Balmoral's use of such high quality solid wood combined with its useful product range means that it is equally suited to both home and contract use.
