IP Request  
Form.doc (110 KB)

Dear customer,

Re: Unit 32, Wimbledon Stadium Business Centre, London, SW17 0BA

Can you please kindly fill in the attached IP request form.

We'll assign you the IP range required upon receipt of your completed form in return.

Should you require any assistance in filling out the form, please do not hesitate to contact me.

Best regards,

Jose Lopez-Henao  
Service Delivery Engineer

D: +44 (0)20 7096 4085

T: +44 (0)20 7096 4100

F: +44 (0)20 7096 4101

W: <http://www.exponential-e.com>

E: [jose.henao@exponential-e.com](mailto:jose.henao@exponential-e.com)

## Purpose

This form will be used to assess the validity of intended public IP address usage. It should be completed by an appropriate person with knowledge of the Internet-facing network infrastructure to which the public IP addresses will be allocated. Due to RIPE guidelines Exponential-e will be unable to allocate any IP addresses unless the entire form is completed accurately.

Please fill in your answers in the shaded grey boxes.

Please complete this form electronically and return by email to your allocated service delivery engineer and the provisioning team ([provisioning@exponential-e.com](mailto:provisioning@exponential-e.com)). If you are unsure who your service delivery engineer is, please contact your account manager.

**Resellers:** Please note that all information must relate to your end user

## IP requirements

Exponential-e can issue IP addresses to you sufficient for your anticipated needs, allowing for 3 months of planning in accordance with the latest RIPE guidelines.

Total request size	
Number of IPs needed now	
Number of IPs needed in 3 months	
Have you considered using NAT (Network Address Translation) or PAT (Port Address Translation) instead of, or in addition to, public IP addresses?	
Have you considered IPv6 addressing to complement IPv4 (dual stack)?	
Date of IP address request:	
Any Exponential-e IP address blocks being returned (list address ranges) and the date of return:	

In order to comply with the requirements for PA (Provider Aggregated) IPv4 address space according to RIPE 489 documentation (<http://www.ripe.net/ripe/docs/ripe-489>), legitimate address use must be justified to the RIR (Regional Internet Registry) by the ISP (Exponential-e) and, in turn, the Internet service user must justify their request to the ISP. Please note that if RIPE discover that requested IP address space has been accounted for inappropriately or inaccurately, IP addresses may be withdrawn from the ISP and the end user. This could result in major Internet connectivity problems should address ranges be split up or withdrawn in the future.

Please complete the table overleaf with IP address requirements on a per-device basis (an example has been provided below):

Type of device	Make <u>and</u> model	Number of IPs	Reason, if multiple IPs required
<i>Router</i>	<i>Cisco 1841</i>	<i>1</i>	
<i>Virtual server #1</i>	<i>HP DL360</i>	<i>3</i>	<i>Multiple VMs; web servers with SSL certs</i>

# Justification of IP usage

Please continue on additional pages if required.

Type of device	Make <u>and</u> model	Number of IPs	Reason, if multiple IPs required
