

## PRODUCT ADVICE

To maintain your carpet's appearance it is recommended that it is vacuumed at least three times per week to remove particles of dirt and dust. An upright vacuum with a beater bar and brush is recommended for use with cut or loop pile carpets. Please note, over time, regular foot traffic will flatten the pile surface in the main walkways causing the areas of different wear. These areas will appear lighter of shade in comparison to the less frequently used parts. The shading/tracking or flattening happens to all carpets with a pile surface and as such is not accepted as the basis for any complaint.

### HEATHER SHADES

In manufacturing the heather shades several contrasting colours are blended together to create a heather yarn, as such random coloured flecks will be apparent in the carpet. These flecks form part of the effect and are not considered the basis of any claim.

### MATCHING

Samples may not be from the same production batch as current stock and therefore should be used as a guide and not as an exact match. Equally matching between 5 metre and 4 metre widths cannot be guaranteed.

### IMPORTANT

A good quality, new underlay is always recommended when fitting a new carpet.

### CUT LENGTHS

Minimum order for 1m wide is 3 linear metres, 4m and 5m wide is 1.50 linear metres.
