

.....cont/2 (GJR6254)

I would add that although National Grid accept that the responsibility that the road should be kept in a safe condition we are not under any obligation to improve the standard of the road as being suggested by one or two of the occupiers of the industrial units which use the access.

Subject to meeting on site I will of course keep you informed of the works that we are intending to carry out in the short term and as far as I am able the long term intentions of my operational colleagues in Warwick.

Many thanks

Yours sincerely
