

Using our Easyshim Carpet Shims we have simplified overcoming the problem that exists in almost every home, the difference in heights between flooring.

Using our Easyshim Carpet Shims, carpets can be ramped up to 30mm to give a smooth transition which is ideal for wheel chair access.

Easyshim Carpet Shims are for use when installing carpet next to hardwood, ceramic tile, stone and marble floors. They produce a smooth, level transition in doorways where without their use there would be a step and therefore a tripping point.

When having carpet fitted, ask your fitter for Easyshims. Any height differences between flooring are smoothed out in a subtle way.

Easyshim 6mm

Easyshim 9mm

Easyshim 15mm

Easyshim 12mm
