Please Note

Inset rug area – The surrounding wooden floor is 20mm high. I know the builders will be building up the rug area, if they could use 9mm plywood that should ensure the sisal is a similar height to the wood.

Skirting Boards – Through the process of fitting a new carpet, a necessary level of force is required to ensure the carpet itself is securely fixed between the gripperod & skirting board. Please note that if a skirting board is not properly attached to the wall this may result in it pushing in at the base & coming away from the wall at the top. This is not a consequence of poor installation from our fitter therefore this is not something Mr Carpet (London) Ltd can be held responsible for and you will need to arrange any remedial work required to finish the job if need be.

Floorboards – Any unevenness in floorboards will show through to the pile of a fitted carpet after installation, carpet & underlay are soft materials will shape out to whatever they are laid on top of. Please ensure that floorboards are levelled prior to our visit, in some cases it may be necessary to have hardboard or plywood laid over the floorboards to negate this issue.

Order subject to terms & conditions printed overleaf.
