Please Note

Concrete Sub-Floor - As the concrete sub-floor in the kitchen extension had only recently been laid and the areas are not yet weather tight it is imperative to ensure that all residual moisture contained within the sub-floor has fully evaporated prior to the new flooring being installed, therefore once the areas are fully weather tight we strongly recommend using a dehumidifier to help draw out any residual moisture contained within the floor as this will speed up the drying process.

Plank direction - This order is based on the vinyl planks being laid straight (i.e. from front to back)

Door trimming - It is often necessary to have doors trimmed prior to new flooring being installed. Our fitters do not trim doors; therefore please ensure that your contractor trims the doors to allow for the new flooring & floor screed as well or carpet & underlay as applicable prior to the installation.

Kitchen Units - Our quote is based on the tiles being installed after the kitchen units have been fitted
