Prepared For Jessica Kinsey

Identified 3 Issues

Colin Symonds

Mr Carpet Ltd

Kitchen Doorway

The recommend doorbar at this juncture would be a tile edge with a 9mm easy shim to raise the height of the carpet to meet the wood.

However, as the existing stain on the wood has not been finished to the end of the wood floor a bare Unstained piece of wood will be visible. Therefore the appropriate tradesman should stain or paint this area in the grey colour to match the rest of the kitchen.

Kitchen Doorway

The white arrows show where the existing bare unstained wood will be visible when a tile edge and easy shim are installed. In our opinion this would not look aesthetically pleasing!

Bathroom Doorway

If the Existing wood threshold ramp is to remain at this juncture then we will fit the new carpet up to or beneath it the same as the previous carpet was installed
