### **Nosing Required By Others**

The carpet will finish at the top of the last riser indicated by white arrows. therefore the appropriate tradesman (carpenter) will need to install a wooden nosing to finish off the laminate flooring that has recently been laid. As indicated by the red arrows

This work should be completed in advance of our fitters arrival.

Unfortunately, our carpet fitters are not qualified and do not have the correct tools or carpentry skills to undertake this type of work
