Prepared For Jane Blevins

6 Issues Identified

KITCHEN FLOOR

Areas marked with white arrows are bare floorboards and areas with red arrows is 15mm engineered wood boards. The height difference would need to be filled in & levelled by builder/carpenter prior to installation of new cushion vinyl and sub-floor preparation

KITCHEN FLOOR

Floor boards taken up

KITCHEN FLOOR

The kitchen units appear to be fitted on top of the 15mm engineered boards so it will be difficult to prepare with new plywood until the missing parts of the sub-floor are filled in & levelled by the appropriate tradesman
