7 Issues Identified

A handwritten signature in black ink, consisting of a stylized 'A' followed by a horizontal line that curves upwards to the right.

Anthony Oguzhan Rickard

Loft Bedroom Cupboard Door

Single nap lock to be fitted in position of red line

Loft Bedroom En-Suite

Zig zag trim to be fitted to tiles, as they are thin. A cut to be put in to bar to go into corner. Not guarantees on neatness as not ideal tile finish location

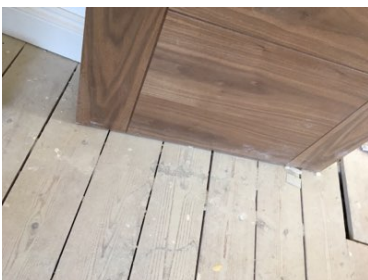

Loft Landing

Step up in loft landing riser will need smoothing out before carpet can be fitted to this area.

Loft Half Landing

Lips in flooring on this landing will show through carpet. Will need to be smoothed out before fitting

Main Floor Bedroom Doors

All doors are flush with the floor. Doors will need to be trimmed to allow for height of carpet and underlay

Main Floor Bedroom En-Suite

Tiles in en suite are flush with the subfloor so a single naplock will be fitted here to account for drop down

Main Landing Lip

Tile flooring being fitted to main landing. Builder will finish tiles with appropriate trim and our carpet will start under the lip of the landing
