# BLADERUNNER & SOLERUNNER

Rubber floorcoverings  
performance flooring for extremely heavy traffic areas,

# Application

## Solerunner

Typically used in shopping centres, public buildings and on exhibition stands, Solerunner is ideal for any area of medium to very heavy traffic, indoors or out, where durability, noise reduction, glare reduction and appearance are important.

Furthermore, for wet areas where safety is paramount, such as around swimming pools, Solerunner Uni and Solerunner Stone have all the usual benefits of Solerunner, but are quick drying, and even slip-resistant under wet conditions.

## Bladerunner

Engineered to meet the exacting needs of the most extreme environments, Bladerunner benefits from an extremely dense, elastic structure that makes it incredibly durable, and able easily to withstand heavy equipment and high-impact shocks such as dropped weights, golf spikes or ice skate blades.

What's more, this same elasticity means that Bladerunner absorbs the impact of athletes' bodies, increases comfort and reduces injuries.

# Technical Data

### Bladerunner Tiles

- Size: 570mm x 570mm (=0.325m<sup>2</sup>)
- Thickness: 6, 8 and 10 mm (10mm stocked in black/blue).

**Bladerunner - Custom Colour**

**Design your own exclusive flooring**

Choose your preferred colours and sizes of granulate. We offer coloured granulate in 3 different sizes: large, medium and fine. The coarse granulate must not make more than 20% in total quantity of raw material required for a particular formulation. Every formulation shall include a minimum of 5% black granulate.

This option is subject to minimum order quantities.
