V4 Collection - Autumn 2019 Price Guide

The Products in this book are priced per square metre unless stated otherwise and include VAT. The prices are intended as a guide only. For competitive quotes on supply and installation please contact your nearest V4 Approved Retailer.

Welcome

V4 WOOD FLOORING®

V4 Wood Flooring specialises in providing quality hardwood flooring through a network of specialist approved retailers, who are able to offer independent advice and expert installation service so that your floor should last a lifetime.

WHAT ARE V4 DOING FOR THE ENVIRONMENT?

As a leading brand of hardwood flooring within the UK, V4 Wood Flooring are committed to sustainability and always looking for new ways to lessen the impact the flooring industry has on the environment.

LESS IS MORE

V4 has taken the bold decision to remove solid hardwood planks from the Collection, replacing this range with more floors which have just a solid hardwood wear layer backed on engineered bases made from fast growing, spruce, poplar and birch wood. By doing this the yield from a single tree is increased by up to 60%, meaning fewer slow growing trees are used. This is key as the popularity of hardwood flooring increases worldwide and it is hoped that the rest of the industry follows this more sustainable path.

REFORESTATION

It is a common misconception that hardwood flooring is a cause of deforestation. Our timber is only sourced from well managed and sustainable purpose farmed forests. This means that only mature trees are selected for harvest. And for each one of these trees felled several more fast growing saplings are planted for the next generation.

WOOD FLOORING IS A CHOICE FOR LIFE

Unlike deforestation where the trees are burnt and the harmful carbon emissions let into the atmosphere, the trees harvested for wood flooring are processed and installed in homes therefore the carbon absorbed by the tree never escapes into the atmosphere. Once installed unlike many other products on the market there shouldn't be any necessity to change or renew. Wood flooring can be kept clean easily, and well maintained it will last a lifetime. Instead of being replaced a worn floor can eventually be refinished and rejuvenated.

RESPONSIBLY SOURCED TIMBER

V4 is proud to be FSC® and PEFC® certified. All V4 Wood Flooring products are produced in FSC® certified factories and comply fully with the European Timber Regulations. Look out for the logos on certified products.

V4 QUALITY GUARANTEED

All V4 Wood Flooring is covered for domestic use by a 35 year guarantee. Visit v4woodflooring.co.uk for full details.

Product Icon Key

The icons below are used to denote key features and characteristics of each floor and will help you decide at a glance if a floor is right for your requirements.

-  35 Year Domestic Use Guarantee
-  Wood's Good UV Lacquer Finish
-  Wood's Good Oil Finish
-  Wood's Good UV Oil Finish
-  Wood's Good Hardwax Oil Finish
-  Unfinished
-  Suitable For Under Floor Heating
-  PVAC Adhesive To Fix T&G
-  Floated Installation On Underlay
-  Direct Fixed With Secret Nails
-  Direct Fixed With Adhesive
-  Micro-Bevelled On 4 Sides
-  Tongue & Groove Fitting
-  Lock System Fitting
-  PU Coated With AC4 Wear Rating

At V4 we are specialists in supplying consistent quality and good service is part of that. As some of the products in this book are manufactured to order and therefore subject to different delivery times, these labels are intended as a guide. Schedules may vary at time of order. Welcome to V4 World

Discover your perfect wood floor and more at V4 World

Now open Monday to Saturday and situated at V4 Wood Flooring's Surrey HQ in Horsell, this purpose built design centre includes 300 sqm of display floors and over 500 large format samples which include plank, herringbone, chevron, reclaimed and bespoke wood floors.

Along with wooden wall cladding solutions and colour matching solid oak dining tables the space houses the full collection of concrete floor and wall panels from Concreate®.

Visitors are taken on a journey of creative exploration, uncovering new and innovative surface solutions, designed to complement and satisfy any interior brief, whether it is commercial or residential in scale.

Choosing The Right Floor

All of our wood floors are engineered which means they have a top layer or lamela which is milled from solid hardwood, this layer is bonded to a base layer of a mixture of faster growing timber. The result is a stable construction which can be installed in most interior spaces and on just about any type of subfloor including over under floor heating. At V4 we decided to stop producing purely solid floors on mass because it is wasteful and not a sustainable use of hardwood, and there is no discernible difference between a well engineered floor and a solid floor.

Engineered Plank

Plank or one strip floors are available in many different widths and lengths and are usually bevel edged to emphasise each board. Engineered Planks can be installed as floated or fully bonded floors

Engineered Herringbone

Usually fitted with left and right blocks to form the distinctive herringbone pattern, the V4 Zigzag range has universal blocks which can be used to make different patterns. Installation is fully bonded.

Engineered Chevron

Otherwise known as French and Hungarian Herringbone, the header joints are angled at 45 or 22.5 degrees to form the distinctive chevron pattern. Installation is fully bonded to the sub-floor.

Laminate Flooring

Our laminate floors are made of the highest quality high density soft wood fibre board. The wooden surface is imprinted with images of real hardwood floors and given a tough textured coating which looks and feels like natural wood flooring.

Choosing The Right Finish

All our floors are finished to the highest level to suit the type of surface. Choosing the right finish for your needs is an important factor in choosing your perfect floor. Each finish has distinctive characteristics and may need varying degrees of care and maintenance.

UV Oil

Up to four coats of Danish oil are buffed into the top layer and cured under UV light.

Finish: A satin sheen is added to the oiled surface of the wood.

Usage: Perfect for living rooms and bedrooms. In kitchens and dining rooms extra maintenance is recommended.

Care: Use Wood's Good Natural Floor Care for regular cleaning. Avoid scratches by minimizing surface dust and grit, use felt pads to protect from furniture. Wipe up any spillages quickly.

Maintenance: Initial application of Wood's Good Natural Floor Care Refresher after installation with periodic application thereafter which will depend on usage.

Natural Oil

Up to four coats of Danish oil are applied and machine buffed into the top layer, impregnating the surface.

Finish: The most natural finish of any, creating a deep lustre whilst maintaining the tactile surface of the wood.

Usage: Perfect for living rooms and bedrooms.

Care: Use Wood's Good Natural Floor Care for regular cleaning. Avoid scratches by minimizing surface dust and grit, use felt pads to protect from furniture. Wipe up any spillages quickly.

Maintenance: Initial application of Rubio Monocoat Universal Maintenance Oil after installation with periodic application of maintenance oil thereafter which will depend on usage.

Hardwax Oil

Up to three coats of hardwax oil are buffed into the top layer. The high solid oil oxidises to form a wax surface.

Finish: A rich, smooth and durable surface.

Usage: Perfect for living rooms and bedrooms. In kitchens and dining rooms extra maintenance is recommended.

Care: Use Wood's Good Natural Floor Care for regular cleaning. Avoid scratches by minimizing surface dust and grit, use felt pads to protect from furniture. Wipe up any spillages quickly.

Maintenance: Initial application of Wood's Good Natural Care Refresher after installation with periodic application thereafter which will depend on usage.

Lacquer

The top layer is spray coated with multiple coats of primer and then two coats of durable UV cured lacquer.

Finish: A smooth hard wearing and low maintenance surface which enhances the natural grain and beauty of the wood.

Usage: Ideal for kitchens and dining rooms where there is high risk of food and drink spills.

Care: Wood's Good Natural Floor Care for regular cleaning. Avoid scratches by minimizing surface dust and grit, use felt pads to protect from furniture. Wipe up any spillages quickly.

Maintenance: After long term use can be sanded and resealed with lacquer.

Choosing The Right Grading

V4 Wood Flooring is milled, responsibly sourced timber selected for its natural beauty, find out more about the different characteristics.

AB Select/Nature Grade

Planks are selected to give grain and colour variation. There can be a small amount of light sapwood around the edge of the board. Small sound knots and smaller filled knots also add to the natural effect.

ABC Mixed Grade

Popular in species such as walnut. This grade displays more variation in grain and colour with larger sound and filled knots with more sapwood well distributed. Expect small filled cracks and dark streaks.

CD Rustic Grade

More economical timber selection allows for more grain and colour variation with large sound knots and more filled knots well distributed. Small filled cracks and dark streaks are also apparent.

Choosing The Right Surface

The V4 Collection is comprised of many different finishes ranging from precision machined smooth sanding and modern staining processes to the hand rendered distressing and scraping done by skilled carpenters using traditional tools with centuries old techniques. Each process gives a board its individual characteristic.

Smooth

The surface is sanded flat. When this surface is oil finished the grain will be slightly raised giving slight texture, whereas lacquer will make it completely smooth to touch.

Brushed

A steel brush removes the soft grain from the surface layer creating a textured surface which enhances the beauty of the natural grain. This also allows for some interesting applications of colour.

Bevel Edged

Most floors have a bevel edge on four or two sides of the surface this is usually a 1-2 mm diagonal edge which helps distinguish the planks and adds character to the floor.

Unfinished

This is a surface that has been milled and sanded smooth and any knot holes or blemishes have been filled, but the surface has not been sealed with lacquer or oil.

Stained

Stain is applied by rollers and buffed to penetrate the top surface of the board and then sealed with either oil or lacquer, resulting in extra emphasis of the natural figure of the wood.

Hand Scraped / Hand Planed

This process can only be done by hand using traditional tools to scrape out the soft grain following the natural contour of the wood. The result is a gentle undulating smooth surface.

Embossed / Deep Brushed

The soft grain is removed with up to 6 steel brushes each one with less intensity. The result is a deep textured grain.

Smoked / Fumed

Timber is stored in chambers and exposed to processes that darken and enrich the natural wood colours. This is ideal for designers where rich tonal variety is preferred.

Cross Sawn

Random saw marks are made across the grain adding extra texture to the surface in order to replicate floors of old. The result is a beautifully tactile wood floor.

Distressed

Various methods are used to give the wood an aged well used appearance also that of a board milled using rudimentary rustic tools. The skill is in making the distressing look natural.

Landscapes

“Large Oak Planks with Rough Hewn Surfaces Inspired by Nature”

Crafted using extrawide engineered European oak planks. Finished by dedicated and skilled craftsmen through the use of traditional hand tools to plane and scrape the oak surface following the contours of the grain. The tool marks are left adding extra character to the flooring surface, made more prominent with muted natural colours and hardwax oil finishes.

Panneau

“Reclaimed Wood Wall Cladding”

Make a feature of your walls with the Panneau wooden wall panel collection. Made from reclaimed and recycled woods the decorative wall panels are available in a range of colours and patterns, bringing the natural beauty and texture of real wood to easy-to-install feature wall panels.

PL4- Cracked Oak

PL4 - Cracked Oak

'Off-cut' strips of cured European oak which are split and cracked to form this rough hewn surface.

£164.00 /m²

PL6 - Cask

Ancient wine barrels are dismantled and recycled for this amazing surface.

£150.34 /m²

PL7 - Pitch Pine

The warm tones from the aged pine are accentuated by the texture of the split staves which reveal the vivid natural grain.

£131.69 /m²

PL20 - Reclaim

Reclaimed chestnut from dusty old agricultural buildings. The rough sawn pieces are interspersed with carved sections of architrave.

£123.00 /m²

PL22 - Accents

Made from reclaimed pieces of internal and external joinery from old European industrial and agricultural buildings.

£164.00 /m²

PL24 - Torched Pine

Selected 'off-cut' pieces of pine are flamed to produce a distinctive scorched surface which accentuates the natural grain.

£116.90 /m²

PL29 - Black Walnut

Made from random blocks faced with a fine American Walnut veneer.

£135.44 /m²

PL51 - Artisan

Thermo treated chunks of Eucalyptus wood are given a deep burnished earth tone, accentuated by the split rough surface.

£166.49 /m²

concreate®

concrete innovation

Concreate® – lightweight floor and wall panels offering a simple, more sustainable alternative to traditional poured and polished concrete.

Large format natural fibre cement floor planks and lightweight wall panels are ready for simple installation in just about any interior space.

Concreate is made from a sustainable form of mineral cement which is air cured to form a distinctive natural patina and each panel is unique.

Concreate is simple to install, transforming interior spaces quickly, using less material than most conventional heavy polished concrete and poured concrete solutions.

V4 Accessories

“For Wood Floors & More..”

Complete your installation with our range of profile bars, beading, nosing, adhesives and underlay. And keep your floors looking like new with our Wood's Good range of wood floor maintenance and cleaning products.

Matching Solid Oak Profiles

With matching door transition bars, edging strips and stair nosings all our floors can be installed to perfection with these PEFC® certified hardwood profiles from V4 Accessories.

Find out more at v4woodflooring.co.uk

Solid Oak Ramp Edge

A solid hardwood profile, fixed to the subfloor which allows for expansion where there is a transition in floor level. To match 15 & 19 mm, L 900/ 2700 mm. Available in lacquered, unfinished and colour matching your chosen floor all on request.

Solid Oak Wood-To-Carpet/ Wood-To-Tile

A solid hardwood profile fixed to the subfloor to allow for expansion where there is transition from wood floor to carpet or tiled surface. To match 15 & 19 mm, L 900/ 2700 mm. Available in lacquered, unfinished and colour matching your chosen floor all on request.

Solid Oak T-Bar

A solid hardwood profile, fixed to the subfloor to cover an expansion gap between two sections of hardwood flooring. To match 15 & 19 mm, L 900/ 2700 mm. Available in lacquered, unfinished and colour matching your chosen floor all on request.

Solid Oak Flush Fit Stair Nose

A solid hardwood profile designed to give a hardwearing edge to a step. Tongue & Grooved to connect into V4 Wood Flooring. To match 15 & 19 & 21 mm, L 900/ 2700 mm. Available in lacquered, unfinished and colour matching your chosen floor all on request.

Solid Oak Square Edge

A solid hardwood edging profile fixed to the subfloor to allow for expansion where a floor meets an obstruction such as a wall or fire hearth. Also used to edge a mat-well. To match 15 & 19 mm, L 900/ 2700 mm. Available in lacquered, unfinished and colour matching your chosen floor all on request.

Solid Oak Lip-Over Stair Nose

A solid hardwood profile designed to give a hardwearing edge to a step. To match 15 & 19 & 21 mm, L 900/ 2700 mm. Available in lacquered, unfinished and colour matching your chosen floor all on request.

Wood's Good Adhesive

“Recommended for V4 Wood Flooring”

Our range of adhesive has been specially developed to give optimum flexible adhesion, with three types of floor adhesive for fully bonding floors to prepared sub-floors and a PVAC wood glue for bonded tongue and grooved floated installations.

WOOD'S GOOD® MS PLUS ADHESIVE

Solvent and water free flexible floor adhesive with a high grab, ideal for working with herringbone installations and perfect for installations over underfloor heating.

WOOD'S GOOD® MS ADHESIVE

Solvent and water free flexible floor adhesive suitable for most installations and quick and easy to spread. Suitable for installation over underfloor heating.

WOOD'S GOOD® LIQUID BATTENS

Applied in liquid battens for an alternative to trowel-on adhesive.

WOOD'S GOOD® PVAC ADHESIVE

Solvent free waterproof adhesive designed for use with tongue and grooved joints of engineered wood flooring and is resistant to moisture and extremes of humidity.

Wood's Good Underlay

“Designed for Floated Floor Systems”

Our underlay has been developed specifically for floated hardwood floor installation.

UK DELIVERY
1-3 DAYS

WOOD'S GOOD® ECOGOLD

Designed to support and cushion wood flooring this amazing underlay is made from recycled car tyres. The insulating gold foil vapour barrier protects against the possibility of rising moisture.

WOOD'S GOOD® TIMBERMAX UFH

This lightweight underlay provides support and cushions the floor whilst its perforated foam gives optimum performance with underfloor heating. Includes vapour barrier.

VISQUEEN MOISTURE BARRIER

A 1000 gauge polythene damp proof membrane for a fully floated system. Should be used beneath underlays where extra protection is required.

Vapour Tape

Used to seal the joints between rows of Eco-Gold Underlay.

Wood's Good® Natural Floor Care

Designed for oiled and lacquered wood floors, Wood's Good Natural Floor Care works on all sealed floor surfaces. Cleaning thoroughly whilst adding a nourishing coat of plant wax, Natural Floor Care is the best way to keep your V4 Wood Flooring looking like new.

Natural Floor Care Cleaning Kit Makes cleaning and maintaining wood floors simple.

Everything you need to clean and protect your oiled and lacquered wood floors and more. The kit includes a 750ml Natural Floor Care spray which is applied using the Wood's Good washable lint free applicator pad with collapsible handle for space saving storage.

Wood's Good Natural Floor Care

Available as an easy application spray which tackles everyday dirt and grime whilst protecting surfaces including oiled, waxed and lacquered wood floors.

Wood's Good Natural Care Refresher

Used neat or diluted to add a protective film to wooden floors.

Good®**
Natural Floor Care

Floor Care Tips

All V4 Wood Flooring has a domestic guarantee of 35 years and if properly cared for your floor will last for generations. The following tips will help you get the most from your wooden floors.

1. Ambient Conditions

During the life of the floor ambient humidity must be maintained within the range of 45% to 65% RH and 18 to 24°C. This includes during periods when the property is unoccupied such as during holidays. Please note that high humidity may lead to warping and other issues, whilst excessive drying caused by high temperature &/or low humidity may lead to splits and warping. Avoid rapid changes in temperature.

2. Entrance Mats

Always have internal and external entrance matting at all entrances to the property; this will help prevent abrasive particles being carried onto the floor, and will extend the life of the floor finish. It is a good idea to fit mat wells so that the mat itself does not damage the floor.

3. Protect From Furniture

Use self-adhesive felt pads on flat furniture feet to protect the floor from excessive scratching, and use felt based castor cups under wheeled furniture. A purpose made polypropylene floor mat must be used below wheeled office chairs. [Note: Heavy scratching will break the seal of the lacquer causing damage to the timber by ingress of dirt and moisture from cleaning.]

4. Planters

A) Take care when watering not to spill water around the base of any planter and avoid using metal trays as these can react with water and the natural tannins in oak to produce black water marks. **B)** A planter with soil soaked in water can cause the underside to be cold which can lead to condensation, so it is a good idea to use protective non-reactive plastic mats beneath pots and trays.

5. Foot Traffic

Stiletto heels may damage wood floor finish and cause compression marks on some wood species, and are not recommended for use on wood floor. Avoid heavy work boots with abrasive soles and thick treads which can retain abrasive objects such as gravel stones. In areas of high foot traffic pay special attention to daily cleaning and where possible use protective rugs and matting.

6. Pet Care

A) Keep pets' claws well trimmed to avoid scratches and protect areas where they sleep and feed to avoid damage from moisture and spills. **B)** Always protect flooring around your pet's food and water bowls from spills and standing water.

7. Sunshine

Wood is a natural material and is affected by UV light. As with the blackened oak beams of ancient houses all wood will mellow and change colour with sunlight. Oak will mellow and become darker and richer in tone whilst the grey brown of American Black Walnut will turn a more golden hue. Each species will react in different ways to UV light. In rooms with large windows, especially those which are south facing, special care should be taken to reposition furniture and rugs to ensure an even colour across the floor. Floors treated with stains and lyes are more stable in strong UV conditions.

8. Clean Up Spills

Avoid standing water or liquid. Mop up any liquid spills quickly and never allow spills to stay on the surface for any length of time. If moisture ingresses into the surface of your floor it may cause lasting damage.

9. Protection Whilst Decorating

A) When protecting your floor, where possible avoid covering with plastic sheeting or any material which does not breathe as it can form condensation. Instead use card or fabric dust sheeting. **B)** When using masking tape to paint round architrave and skirting, **DO NOT** leave tape on the floor longer than it takes to paint each coat. If left for more than a couple of hours, tape adhesive can react with the floor finish causing damage. **C)** If paint is spilled remember that cleaning fluids may damage the floor so avoid if possible, instead use mild soap and a nylon brush to work away the paint.

10. Regular Cleaning

Daily/weekly cleaning consists of sweeping with a soft broom or dust-attracting flat head mop. Floors can be periodically cleaned with an almost dry wrung out mop, avoiding use of excess moisture. **NEVER WET MOP WOODEN FLOORS.** All spills should be wiped up immediately with an absorbent kitchen towel.
