

**ENSURE that the whole of the Smartware folder has been copied to the local C: drive**

**This should include the "Distro\_45" and "Crystal Reports" folders**

### ODBC setup

1 From "C:\Smartware\Distro\_45" run "setup.exe" (as Admin if necessary); select the "Smartware 4.5" radio button.

At "Setup Type", select "Custom" and make all boxes are unchecked EXCEPT for

Crystal Reports Runtime files

ODBC Manager (required)

ODBC Driver for Smartware

to complete setup

2 Run "ODBC Data Source Administrator" by typing "ODBC into "START/Search programs . . . "

"Add" driver "Smartware driver"

Complete entries as below and finish

**Database**

Data Source: MRC\_Xtal\_data

Database Type

Smart4

Local-Smart5

C/S-Smart5

Server:

User ID:

Password:

Please enter database directory.  
Note that if you are using C/S-Smart5  
and your server does not use ctuser.dll,  
then you cannot get a list of table names.

C:\SW2000\Xtal\_data

OK Cancel

### Crystal Reports setup

3 From "C:\Smartware\Crystal Reports" run "Crystal Reports 8.5 Runtime (SWIP) 201301.exe" and then double-click on "Crystal8-5SmartWareMulti-TablePatch.reg" to complete the installation
