Please Note

Stair runner installation – During the stair runner installation there is a possibility that some cracks / chips may appear in the exposed paintwork (especially if the staircase has been filled before being painted). This is because the staircase is a timber construction & as such is subject to movement caused by vibrations when the fitter nails the grippered fixings in place & also when they bolster the stair runners into the grippered gully which has to be done with a reasonable amount of force to ensure the carpet is secured correctly. Unfortunately, this is unavoidable and we cannot be held responsible for any redecoration works that may be required

Parking Permit – Due to resident only parking restrictions outside the property, we will require you to provide a visitor parking permit to the fitters for the duration of the installation to enable them to park their van nearby
