## WHAT OUR CUSTOMERS SAY...

"Proton lifted and disposed of the moth infested carpets in our flat, vacuumed up all debris from the moths and then treated the whole flat to kill the moths... Asa visited the flat to quote, and provided **expert and helpful advice**. On the day of the work, Asa and his team turned up promptly, and carried out the work efficiently, leaving the flat very clean. I would **highly recommend** this company for moth control work – they are **specialists in moth control** unlike most pest control companies."

TrustPilot - July 2023

"Asa was very **helpful and informative**. He initially came to the house for an inspection and consultation and took time and efforts to explain the process to me. On the day of the treatment his assistant and he were on time, super polite and efficiently dealt with our massive moth problem – **Highly recommended** and **great value** as well."
