

Cleaning and Maintenance of Premier Trims

Standard Finishes

Polished Brass

Our Polished Brass profiles are designed to age for a natural finish over time.

However if you want the profiles to stay highly polished then you will be required to clean them with a suitable metal polish and a soft cloth on occasion.

Please protect you flooring both sides when polishing trims.

Satin Brass

To clean simply wipe with a dry duster.

Any small marks or scuffs can be removed by simply using a the green side of your dish sponge. Simply start one end of the trim and continue all the way all the profile. Please note the sponge need to be bone dry.

Do not use any liquids to clean this finish.

Antique Brass & Antique Bronze

To clean simply wipe with a dry duster.

Heavily soiled spots can be cleaned with damp cloth but must be dried immediately.

PLEASE NOTE ALL STANDARD FINISHES ARE "LIVING" FINISHES, WHICH MEANS THAT IT'LL REACT TO THE ENVIRONMENT.

YOU NEED TO AVOID CONTACT WITH WATER/MOISTURE.

ANY WATER/MOISTURE WILL CREATE MARKS THAT OXIDIZE FASTER AND THIS MAKES IT VERY HARD TO REMOVE WITH THE ABOVE CLEANING METHODS.

ANY CLEANING PRODUCTS WILL DAMAGE THE ABOVE TRIMS SO PLEASE FOLLOW THE GUIDES ABOVE

Specialized Finishes

Chrome, Brushed Chrome, Satin Nickel, Polished Nickel, Black and Pewter

To clean simply wipe with a dry duster.
