TOG RATINGS

Tog ratings of a high quality wool carpet depend on pile weight, density of construction and type of backing. As a rule of thumb, the higher the density of these three materials, the higher the tog rating. However, there are some cases that differ. For example Fine Worcester Twist has a tog rating of 1.71 and is 1/10th gauge/50 oz, whereas Kasbah Twist has a tog rating of 2.16 and is only 5/32nd gauge/44 oz! (See full list of our products and ratings below).

Some customers are surprised to hear that the insulating effect of underlay and carpet together are not fully cumulative. By that we mean that the tog rating of both carpet and underlay should be added together **and 1.0 tog subtracted**. This calculation has been proven to give a more realistic value and was carried out by the Carpet Foundation and the Underfloor Heating Manufacturers Association (UHMA).

For example, a consumer has an under floor heating system that allows a carpet and underlay to the maximum of 2.5 tog.

If they choose Fine Worcester at 1.71 tog and an underlay at 1.4 tog, the calculation would be:

$$1.71 + 1.4 - 1.0 = 2.11 \text{ tog}$$

that makes the carpet and underlay combination acceptable.

We hope this helps customers who may not have known about this calculation - by subtracting the 1.0 tog you can now include high quality wool carpet options for fitting over an under floor heating system.
