### How to calculate the cost of your bespoke rug

You can visit the "Rug Calculator" on our website: [www.fibreflooring.com](http://www.fibreflooring.com) . Click on the individual product and the rug calculator is on a tab to the right of the image. This will give you an RRP which is double your trade price + VAT.

A quick way to work out the trade price of a rug:  $\text{net trade price} = \text{RRP} \div 2.4$

1. Cost of flooring: multiply the length by the width i.e. how many square metres. Multiply this figure by the cut length price of the flooring.
2. Cost of binding: calculate how many linear metres you need by adding up all four sides of the rug together to get the perimeter i.e.  $L + L + W + W = \text{perimeter}$ . Multiply this figure by the cost of the binding.
3. Add the cost of the flooring to the cost of the binding. **N.B. if the rug is less than 2m wide please add a 25% surcharge to this figure.**
4. Remember to include any extras; Intec or rug underlay & add VAT

### Surcharges and Restrictions

**If your rug is:**

Less than 1 meter in width

Over 5 metres in length or an unusual shape e.g. internal mitred corners

All stair runners
