

GRANORTE[®]
delivering nature

PRICE LIST 2015

Why cork

Cork is the outer bark of the cork oak tree, which grows mainly in the Mediterranean region of the world. This tree has a life span of about 200 years. Each cork tree must be 20 to 25 years old before it can provide its first harvest of cork. After extracting the cork a new layer starts generating and nine years have to pass until a new harvest can take place. The cork harvesting is made in a sustainable manner and does not harm the tree which is never cut down or removed.

With the increasing concern for the environment, cork oak remains the only tree whose bark can regenerate itself after harvest leaving the tree unharmed. It is truly, a renewable, environmentally friendly resource. Furthermore, the cork oak tree has the remarkable capacity to retain carbon and a harvested cork tree fixates almost five times more carbon. This exceptional characteristic makes cork a naturally sustainable product and its use contributes to the preservation of a unique habitat in the world.

Naturally sustainable alternative

Cork can be harvested from the same tree for about two hundred years and every harvested cork tree fixates between 3 to 5 times more carbon. The harvesting is made with minimal impact on the environment and no trees are cut down to bring you this product. Cork is the perfect environmentally friendly, renewable and sustainable material.

Comfort

Cork, as a natural product, warms and enriches any interior. With over 40 million natural "cushion cells" per cubic centimetre, cork is a natural sound and thermal insulator. Cork floors are beautifully quiet and comfortable underfoot, warm and pleasant to the touch.

Safety

Cork floors do not absorb dust and are resistant to bacteria and fungus. They do not cause allergies nor pose a risk to asthma sufferers. Adhesives and finishing products used in the manufacturing of cork floors are formaldehyde-free and Volatile Organic Compounds (VOC) emissions are not detectable.

Amazingly versatile

Designers can explore the material in a surprisingly creative fashion. By altering the colour and the way the cork is 'laid up' it becomes possible to create a whole range of textures and visual effects, without upsetting performance and maintaining cork's natural properties.

Durability and easy maintenance

GRANORTE's advanced coating technology gives cork floorings a highly resistant and long-lasting protection even in high traffic environments. Due to the special factory finish, cork floors are not only durable but they require only minimal maintenance.

Portuguese cork forests drain 4,8 million tons of carbon dioxide from the atmosphere each year. Mediterranean cork forests represent a carbon sequestration of 5,7 tons CO₂ per hectare per year, about 14 million tons annually. Near 1,5 hectares of cork forest are enough to compensate for the annual carbon dioxide emissions of an average vehicle. Cork harvesting increases CO₂ capture and storage. Every harvested cork tree fixates between 3 to 5 times more carbon. The total annual production and harvesting of cork retains from the atmosphere the CO₂ equivalent of about 185.000 automobiles.

How we do it

Our philosophy is to challenge what has become habitual, and to never be satisfied with anything less than the best. We seek perfection each and every day and ensure that our products meet all international quality requirements and technical specifications.

Our aim is to fascinate people, designing and creating stunning cork products that capture the imagination and inspire beautiful and eco-friendly interiors.

Using only the best raw materials and state-of-the-art technology, GRANORTE offers a diverse range of products for both residential and commercial environments, delivering eye-catching styles as well as superb quality.

WEARTOP armour

high performance coating

High Performance Ceramic Finish with very high wear, impact, scratch and slip resistance.

HCA2K

hybrid ceramic hotcoating

HotCoating® PUR and waterbased finish with very high wear, impact and chemical resistance with a natural look-and-feel.

AQUA2K+

2K waterborne finish

Very low emissions (Emicode EC1R) two component waterborne finish, based on polyurethane resins with very high final hardness, great elasticity and excellent chemical resistance.

HARDOIL

hard-wax-oil finish

Hard cured oil finish for a natural wax-oil look-and-feel.

HIDROCORE

moisture resistant HDF

Low swelling and moisture resistant High Density Fiberboard. CARB phase 2 and Lacey Act compliant.

JOINT SHIELD

edge sealing technology

Edge impregnation system for improved moisture resistance and superior joint protection.

MICRO-BEVEL

4 edges micro-beveled

Micro-bevelled edge aesthetic enhancement.

AGGLOPUR^e

no added formaldehyde

Formaldehyde-free cork agglomeration technology.

HDDP

high definition digital print

Proprietary HDDP technology that delivers unrivalled print quality as its high native resolution together with its variable dot printing (greyscale) capability provide an effective resolution of over 1000 dpi.

AWS

authentic wood structure

Production technology that finely emboss wood structure making floors look and feel natural.

All floating floors from GRANORTE use the industry's leading UNICLIC® profile.

Quality mark that ensures product quality, eco-friendliness, sustainability and the meeting of technical and chemical European requirements in terms of pollutant emissions.

GREENGUARD® Indoor air quality certification for low-emitting interior building materials meeting stringent emissions standards based on established chemical exposure criteria.

German DIBt (German Institute for Construction Technology) Ü mark conformity.

Information representing in indoor air emissions of volatile substances presenting a risk of inhalation toxicity, on a scale ranging from Class C (high emissions) to A+ (very low emissions), according to the French decree for the labelling of construction products.

Certification for safety and energy-saving performance.

Exclusive Microban® antibacterial protection embedded in the agglomerated cork.

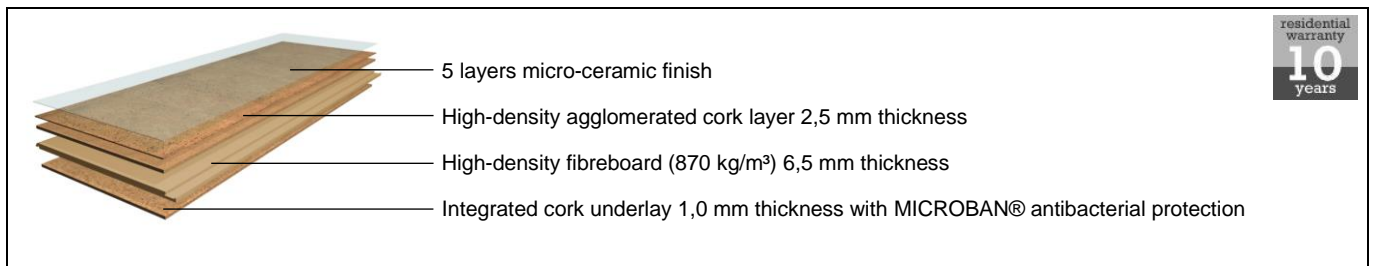

International symbol used to identify products made with genuine cork.

Description		
Range display (showing 12 collections)		250,00
Collection display (cork, vita, corium, vinylcork, linocork, heritage)		150,00
Individual handsets (sampleswatch of each collection)		12,00

NOTES

All prices excluding VAT.

Price includes delivery in UK mainland (except for installation and maintenance products). The prices are based on a minimum order of two cartons.

For smaller orders there will be an extra £8.00 carriage charge.

For installation and maintenance products prices are ex-warehouse. Please ask for a quote for delivery costs.

There will be a surcharge for Scottish Highlands, Northern Ireland and the Channel Islands. Customers should contact for delivery quotation for these areas.

For other off-shore destinations please ask for a quotation.

Most of the products are in stock in our warehouse and we can offer overnight delivery service for orders placed before mid-day.
