

INFORMATION

INSTALLATION

If you are ordering in quantity and require colour matching, please let us know when placing your order. In all contract locations, we recommend an all over stick down method to BS 5325 (1983).

A good quality, new underlay is always recommended when fitting a new carpet.

MAINTENANCE

Correct and regular maintenance will increase carpet life and help keep its appearance for longer. We recommend regular vacuuming with an upright vacuum cleaner, at least once a week for all carpets in all areas. Please note that over time, cut pile carpets may flatten in high traffic areas. This is a natural characteristic and not a manufacturing fault. Similarly, shading (or pile reversal) is the effect of unequal pressure on pile carpets and not a manufacturing fault.

IMPORTANT

Heather shades are created by blending several contrasting colours together. As such, random coloured flecks will be apparent in the carpet. These flecks form part of the effect and are not considered the basis of any claim.

Colours may vary due to the limitations of dye technology. Samples should therefore be used as a guide and not an exact match. Equally matching between 4 and 5 metre widths cannot be guaranteed.

When using castor chairs, the use of a protection mat is strongly recommended. No claims will be considered as a result of improper application, installation or maintenance.
