

Rubbish Disposal Costs

The cost of skips is getting more expensive as we are spending between £1,000 - £1200 per week. I have been monitoring the skips and I have realised that fitters that only work for us a few days a week are sometimes putting other rubbish in the skips from their other work. Also any private jobs fitters are using our skip to dispose of this rubbish.

I realise that it is convenient for people to use our skip and as long as I am getting the cost of the rubbish covered I don't mind if you continue to do so but I will need to recover the cost of the skip space you use.

Therefore any rubbish that does not come from a job that Mr Carpet invoiced to a retail customer the cost of rubbish disposal in our skips will be charged to you as follows.

Full Skip - £260.00 + VAT (£312.00)

Half Skip - £135.00 + VAT (£162.00)

¼ Skip - £70.00 + VAT (£84.00)

Off cuts per bag £15.00 + VAT (£18.00)

Therefore when costing private work charge your customers for the waste disposal to cover your costs.

We will raise a charge for any rubbish in our skip and unless you notify as when leaving the rubbish if you require an invoice for your records we will deduct the costs from your next cheque. If do require an invoice we will charge you the price including VAT.

If you do not notify us we will deduct the above net charges (excluding VAT) from your next cheque but no invoice will be issued.

We only need to cover the costs we pay for the space you use in the skip where we have not charged for the rubbish disposal directly.
