

THANK YOU for letting SMARTSTRAND make your room.
At Lano, our brand is our reputation. We stand behind every product we make.
Thank you for your trust in us, and we hope you enjoy your new SmartStrand
carpet.

25 YEARS Abrasive wear, Texture retention, Fade resistance, Manufacturing
defects

LIFETIME Stain, Pet, Soil, Antistatic

This document contains details of all the warranties featured on Smart-
Strand carpet. Please keep this brochure with these other important papers
regarding your carpet:

- Original invoice
- Copy of sample label (from retailer)
- Cleaning receipts

Retaining these documents ensures that, in the unlikely event of a claim,
you'll have all the necessary paperwork handy. We also recommend keeping
a larger piece of carpet from your installation for your warranty or in case you
ever need to make a repair.

If you have any questions, please contact your local retailer or our offices at:
Lano, Venetiëlaan 33, 8530 Harelbeke-Belgium, tel +32 56 654000

All warranty information in this brochure is effective 1-3-2016.

Cleaner

Easy maintenance and care

✓ *Permanent built-in lifetime stain and soil resistance protection*

✓ *Wash stains off with water*

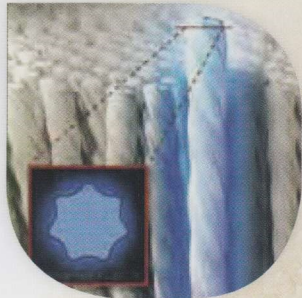

SmartStrand yarns present a closed cellular structure, making it impossible for any kind of fluid or liquid to get absorbed by the fibers. This aspect of the fibers is permanent and does not alter or degrade over time.

Therefore it is safe to say that every SmartStrand carpet is stain and soil resistant throughout its entire lifespan.

A classic carpet treated with protection layer

If by accident the carpet gets stained anyway, in most cases the soiling substances can be washed off with pure water, leaving no marks at all. Depending on the nature and intensity of the soiling substance, in some cases the use of a mild common household cleaner can be required to get rid of the stain. All SmartStrand qualities are bleach resistant (10% diluted).

SmartStrand carpet with built-in stain resistance.

Stronger

Exceptional material properties

Remarkable resilience ✓

Revolutionary fiber ✓

Triexta SmartStrand has been developed by DuPont as a revolutionary fiber with a particular molecular structure and composition leading to a remarkable resilience. Flattening of the carpet caused by heavy use is virtually excluded, since the fibers will always bounce back to their original form and position.

Some of our SmartStrand qualities for domestic use get exceptional contract class resilience ratings of up to 32 and even 33, earning them the title of a lifetime investment.
