

Additional Notes for F23959 Dattani

Builder to meet you on site and let you in. Before he leaves discuss the following points with the builder.

1. Make sure the builders check there is a sufficient clearance for the front door to open. **IF NOT THE BUILDER MUST CUT THE DOOR BEFORE HE LEAVES.**
2. Discuss the trim for the transition between the wood in the lounge and the hall carpet. Customer says the builder has fitted a temporary strip that needs to be removed at the wood floor and he also has a wood trim to fit. The customer says the bar glues on top. We have discussed this at length and it sounds like it is a twin wood joiner that may not work. We have given you a tile edge in case the customers bar does not work.
3. There are blocks of wood fitted behind some of the doors as temporary door stops. Please ensure these are removed before fitting carpet.

Any problems ring Mr Dattani on 07887 953882
