NOTES ON CUSTOMERS ORDER CONFIRMATION

As discussed on site, the w.c. looks at an angle, as the floor runs out. If you wanted to take it out so we can run the flooring under it, you could build up one side to make the w.c. appear square. The plumbing to the w.c. may need to be adjusted.
 The section of the tiled shower tray that has sunk and you want removed is beyond what our fitters can take on, so you would need to find a general builder to carry out this work.
