ATTEND  
NOW 9/10

Hi Carl

Following our visit just now with Richard Clough also in attendance, I am e mailing to confirm the following points discussed

**Rear Bedroom**

The builders to uplift the carpet with care as discussed, to allow them to make good the sub floor underneath

**Bathroom door way**

The metal trim to be replaced and the height issue to be improved with a 6mm gradient shim fitted underneath the carpet at this point

**Small bedroom (with pole)**

When we return we will attempt to improve the tension in this room

**Front bedroom**

As mentioned to improve the cosmetic finish at the base of your fitted wardrobes, a piece of beading to be fitted by your contractor and painted to the nearest finish to match the robe doors

Regretfully this is the best option as the fitted wardrobes were fitted after we had installed the carpet and there is no play in the carpet to improve the current look

In summary we will return and re stretch all carpets and attend to the aforementioned points described

The re fitting of the rear bedroom can be dealt with an envelope price to the fitter of £30.00 on the day to be arranged

Accordingly please phone us when you are ready for us to return , can you allow two weeks when contacting us to organise a date that works with you as well

In the meantime
